

Reports @ IRP

Georgia Tech Office of Institutional Research and Planning (IRP) provides institutional and external reporting, critical university functions that involve the Common Data Set, U.S. News Rankings, and compliance reporting like IPEDS.

Institutional & External Reporting

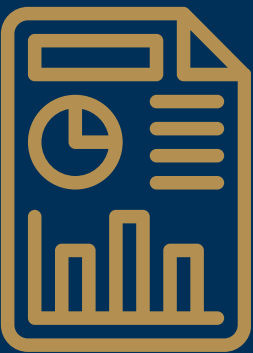

IRP serves as a primary hub for retrieving and reporting institutional data, both internally and to external organizations. On an annual basis, IRP facilitates hundreds of reporting work items that support the institution. This activity ensures accurate data informs both campus and the public about Georgia Tech.

Rankings & Compliance

IRP performs external reporting for independent ranking organizations such as U.S. News and the Princeton Review. The office also handles mandatory external compliance reporting, including federal IPEDS submissions. This reporting is a primary function that provides data necessary for the datasets used in national benchmarking.

Multi-Use Reporting

IRP supplies the Common Data Set (CDS), a frequently used resource that supports multiple external surveys, including those from the College Board, Peterson's, and U.S. News. This helps facilitate national benchmarking and provides critical information to prospective students.

Flagship Products

IRP provides and leads the reporting for our most frequently used flagship products. The yearly Fact Book provides Georgia Tech official data on admissions, enrollment, and degrees awarded, etc. to the public. The Biennial Report, released every other year, showcases our team's expertise in data management and analysis to support Georgia Tech's long-term decision making.
